

Application Developer

Altus Geomatics is a successful Survey Company that provides Field Surveys, Mapping, Remote Sensing (LiDAR/3D Laser Scanning), and GIS (Data Solutions and Systems) services to the oil and gas industry in Alberta, British Columbia, Saskatchewan and Manitoba, Canada.

Primary Role: As a developer your primary responsibilities would be to maintain and debug existing Altus Geomatics' programs and websites. Also you will be required to work with staff to coordinate and develop enhancements to existing programs, and you will be responsible for testing and deploying these enhancements. Further you will be required to update data, execute and export custom queries against sql server databases for staff members. Finally, you will be asked to modify existing or create new SSRS reports or Crystal reports.

Required Languages:

Visual Basic, C#, SQL, T-SQL, JavaScript

API and Development Environments:

- Visual Studio (ASP.Net and Windows Forms) with source control
- SQL Server Management Studio
- SQL Server Reporting Services
- Crystal Reports
- SharePoint

Additional Skills:

- Java
- Apache Tomcat
- Knowledge of Oil and Gas industry
- High attention to detail

Altus Geomatics environment includes:

- Professional growth opportunities
- A fully integrated team that consistently excels in the industry and community
- A growing Client base in a Company that has a strong strategic plan for long-term success
- Above average compensation package including an RRSP contribution program and industry competitive benefits package
- Fourteen Office Locations across Canada: Grande Prairie | Edmonton | Lloydminster | Calgary | Medicine Hat | Swift Current | Saskatoon | Weyburn | Regina | Yorkton | Brandon | Virden | Dartmouth | Moncton

Closing Date: Ongoing
